BOTLAB DYNAMICS

Brand & Identity Guidelines

Who We Are

India's Deep-Tech Creators

India's Deep-Tech Creators

Born at IIT-Delhi

Award-winning team of visionary technologists and designers pushing physical boundaries.

100% In-House

Complete stack control with custom hardware architecture and advanced software innovation.

Proudly Indigenous

An elite 'Make in India' brand building sovereign tech solutions from the ground up.

Global Excellence

Showcasing India's world-class engineering capabilities on the grandest global stages.

Logos

02

WORDMARK

The BotLab Dynamics wordmark is the primary and most recognizable visual identifier of the brand, representing the company across all external communications and touchpoints. It must always appear in its original, approved form and should never be altered, redrawn, distorted, or modified in any way.

The wordmark serves as the core identity across all drone light show categories, including corporate engagements, wedding celebrations, large-scale events, and religious or cultural applications. Its consistent use ensures strong brand recognition, visual integrity, and a unified presence across all platforms and audiences.

Download Assets

SYMBOL

The symbol functions as a refined secondary expression of the BotLab Dynamics brand, intended for use where the full wordmark is not feasible due to size, scale, or format constraints. It is ideally suited for applications such as favicons, social media avatars, digital interfaces, internal communications, and select branded materials that require clarity and elegance at reduced sizes.

While the symbol preserves brand recognition in minimal applications, it is not a substitute for the primary wordmark. For formal, promotional, or external-facing communications, the wordmark should remain the preferred choice unless a symbol-only application is expressly required or approved.

OVERVIEW

The BotLab Dynamics wordmark and symbol must always remain clear, legible, and unobstructed. Proper sizing and sufficient breathing room are essential to maintain visual integrity across all applications, from large-scale event branding to drone show visuals.

Minimum Size

The wordmark should never be reproduced below its minimum size. For digital use, it must not appear smaller than 300px in width, and for print, not below 50mm (2"). When these minimum sizes cannot be maintained, the symbol should be used as the primary brand identifier.

If any detail becomes illegible at reduced sizes, it may be omitted solely to preserve clarity.

Clear Space

Adequate clear space must surround the wordmark and symbol at all times. The wordmark's minimum clear space is defined by the height of a key lowercase character in the logotype. The symbol requires clear space equal to at least 100% of its total height.

The logo should never be placed within crowded compositions or constrained by other visual elements, ensuring consistent recognition and a refined brand presence.

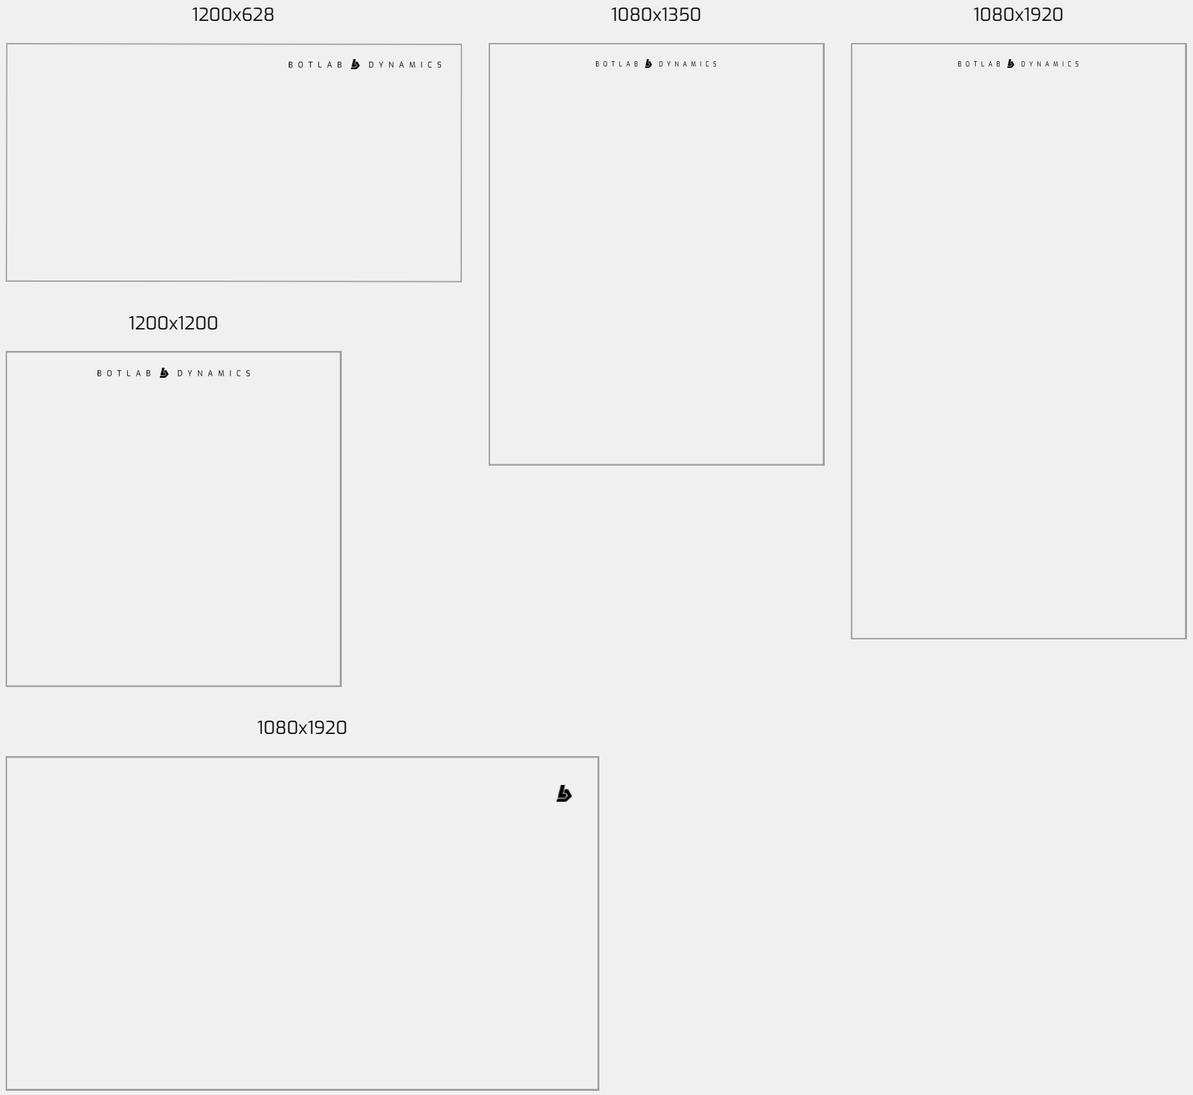

PLACEMENT (ADS)

1200 × 628:
Logo on top-left. Maximum width: 30% of total canvas width.

1080 × 1350 | 1080 × 1920 | 1200 × 1200:
Logo top-center. Maximum width: 30% of total canvas width.

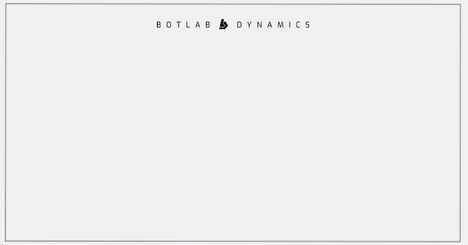

Video / YouTube:
Use Symbol Logo only, placed top-right.
Maximum width: 30% of total canvas width.

- Maintain consistent placement and clear space.
- Keep the logo aligned with the visual hierarchy.
- Avoid placing it over key visuals, text, or CTAs.
- Centered placement is allowed for hero visuals, stage backdrops, large-scale events, drone shows, and minimal applications.
- Never stretch, distort, crop, or randomly position the logo.

- Never stretch, distort, crop, or randomly position the logo.

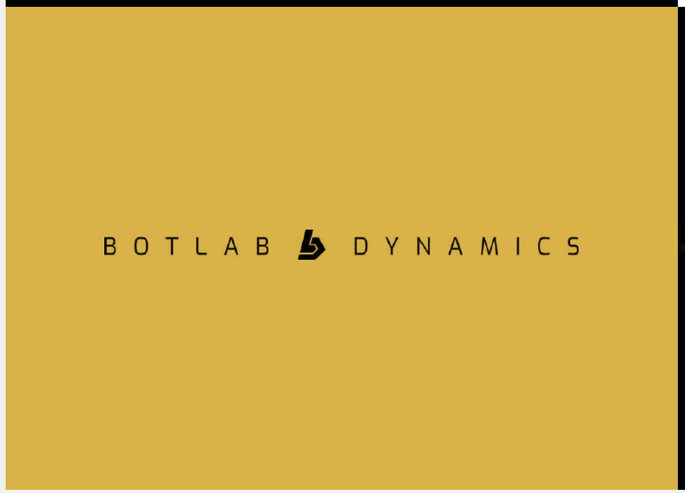

CORRECT USAGE

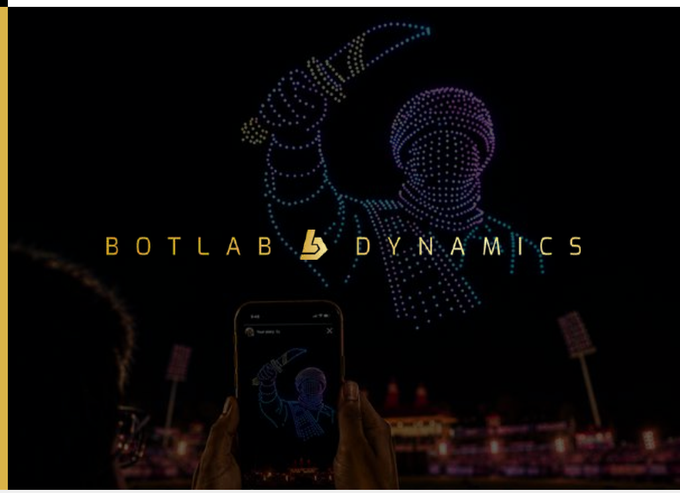

The BotLab Dynamics wordmark must be used only in black, or gold and placed on backgrounds that ensure strong contrast. Preferred background options include black, white, gold, and dark-toned imagery, with a strong emphasis on using dark backgrounds wherever possible.

The gold wordmark should be used on dark backgrounds, while the black wordmark may be used on white or light backgrounds. Grayscale imagery is permitted only when treated to maintain clear contrast and legibility.

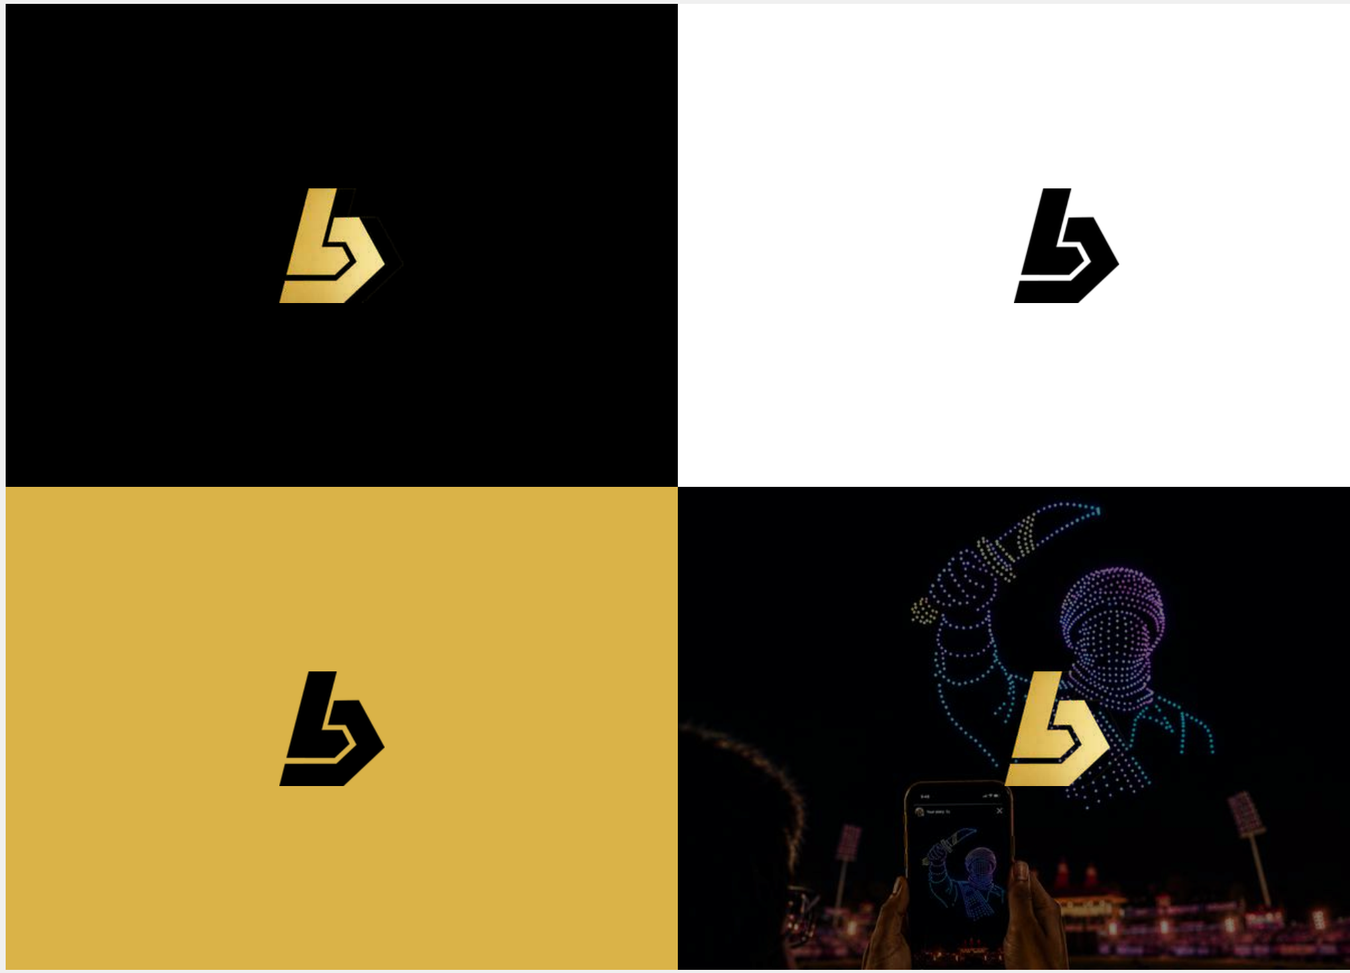

CORRECT USAGE

The BotLab Dynamics wordmark must be used only in black, or gold and placed on backgrounds that ensure strong contrast. Preferred background options include black, white, gold, and dark-toned imagery, with a strong emphasis on using dark backgrounds wherever possible.

The gold wordmark should be used on dark backgrounds, while the black wordmark may be used on white or light backgrounds. Grayscale imagery is permitted only when treated to maintain clear contrast and legibility.

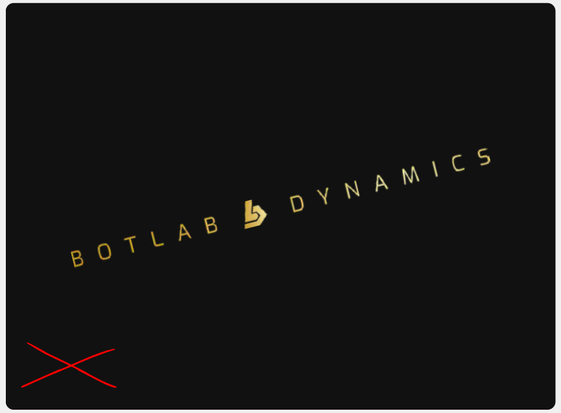

INCORRECT USAGE

Do not stretch or skew

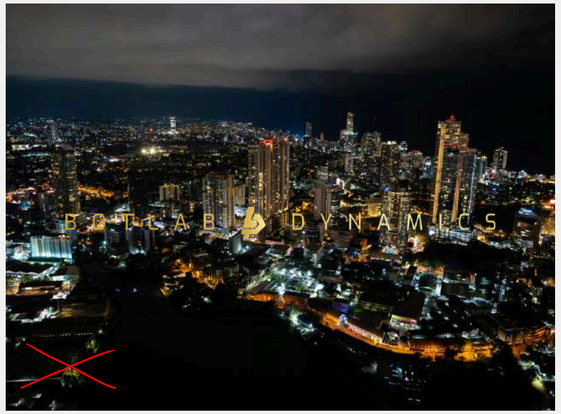

Do not rotate

Do not resize or modify elements

Do not place over backgrounds lacking contrast

Do not use unspecified colors

Do not add effects

Do not outline elements

Do not stack layout

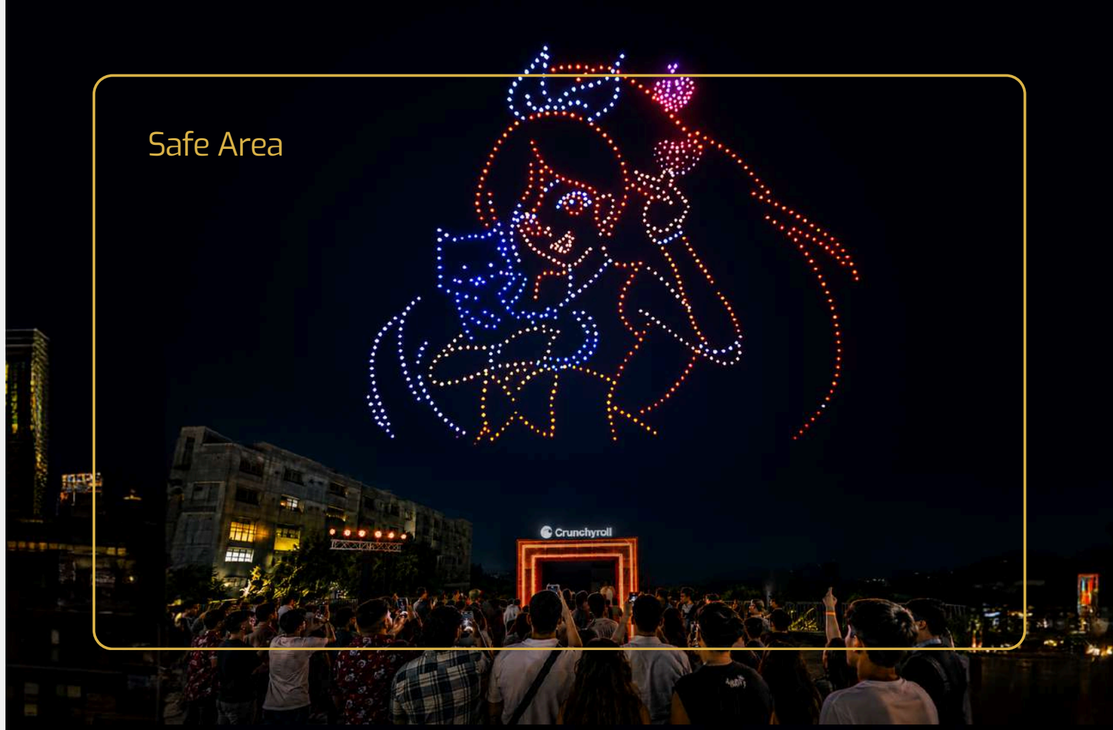

LOGO + IMAGE

Let the image carry the spectacle; the logo signs it.

SAFE ZONE

Use a quiet area of the frame for the wordmark. Never place the logo across a key formation, face, headline or CTA. The existing rule remains: never stretch, distort, crop* or randomly position the logo.

CO-BRANDING HIERARCHY

Partners add credibility; they should not erase the BotLab signature.

✔ Do

-  | VAYUDH
-  | BOTLAB STORE
-  | Partner Logo
-  × Partner Logo

✖ Don't

- Random logo sizes
- Five logos competing in one row
- Partner over key drone formations
- Unapproved lockup constructions

Strategic Archetypes

Merging Technology with Collective Wonder

THE MAGICAL CREATOR

80%

Primary: The Magician

We transform complex engineering into sky-high spectacles. Our role is to evoke wonder and turn "impossible" technical logistics into emotional storytelling.

20%

Secondary: The Creator

Rooted in our IIT-Delhi DNA, we don't just use tech; we build it. Every line of code and drone frame is natively designed for precision and impact.

THE MAGICAL VOICE

Visionary & Inspiring

Our language should sound like a peek into the future, never dry or purely industrial.

Confidently Technical

We speak with the authority of engineers who own the full hardware and software stack.

Global Excellence

We represent Indian engineering on a world stage, projecting scale, reliability, and mastery.

Emotionally Charged

We focus on the "Awe" factor, the memory etched in the audience's mind long after the drones land.

SHOULD BE vs SHOULD NOT BE

	✔️ Should Be		✖️ Should Not Be
☑	**Visionary & Bold** Experience the future of storytelling. Turn the night sky into your ultimate canvas.	⊗	**Generic Service Provider** We provide drone light show services for corporate events and promotions.
☑	**Authoritative & Precise** 100% homegrown hardware. Perfectly choreographed. Flawless execution.	⊗	**Basic Functionality Focus** Our drones are programmed well and are very safe to fly.
☑	**Awe-Inspiring** The undisputed pioneers of next-gen sky art.	⊗	**Locally Constrained / Passive** One of the companies doing drone shows in the region.

TONE OF VOICE PRINCIPLES

Visionary, Yet Grounded

We speak about the future of entertainment with massive ambition, but we back it up with undeniable engineering facts. We don't use empty hype; our tech speaks for itself.

Authoritative & Precise

As pioneers of indigenous deep-tech and drone shows in India, we speak with undisputed authority. Our language is sharp, deliberate, and exact—just like our flight formations.

Awe-Inspiring

We don't just sell services; we sell magic. Our language should evoke emotion, scale, and wonder. We invite audiences to look up.

BRAND PERSONALITY

Brand Attributes: **Confident, Trustworthy, Entertaining**

We are masters of our craft, a modern-day Daedalus fashioning infallible wings that have weathered the Indian summer. We dreamed big, and believed absolutely in our capabilities to fulfil them. Our industry leader position is hard-earned, and built on the back of much hard work and perseverance. We are assured and audacious today, and we wear our scars as badges of honour.

BRAND NARRATIVE

At the time we started out, India was reliant on other countries for its defence needs. We wanted to be part of the solution. We set out to help India be self-sufficient in protecting her people. We focused on our R&D with purpose and vision, and soon, our big moment came. We were invited to demonstrate our tech at Pokhran, in front of the biggest political and defence decision-makers of the country. And here, we failed - the foreign components of our drones could not withstand the brutal Indian weather. But amidst the heartbreak, a quiet determination took root. Never again would we deploy a drone whose parts we had not designed. We made our own Flight Controller, GPS, ESC, and software to support it all. Successful hardware startups were few and far between then. But we knew we had what it took. The next step was getting a chance to prove it.

Fortune favours the bold. The Ministry of Defence saw our tech demo and asked us to create a 1000-drone light show for the Beating Retreat Ceremony, 2022. We had never flown more than 50 drones together then! We got to work. On 29th January 2022, we made India the fourth country in the world to have hosted a 1000 drone-strong show! We had arrived, and how! Since then, we have conducted the World's Biggest Drone Show, Africa's Biggest Drone Show of 2022, India's First Aerial QR code, and brought drone light shows to many geographies for the very first time. We continue to make lighter, more precise and durable drones, all in-house. We are industry leaders, inspiring more hardware start-ups and accelerating the development of India's indigenous drone ecosystem. We survived our setbacks and learned from them, creating our own light and aligning our own stars!

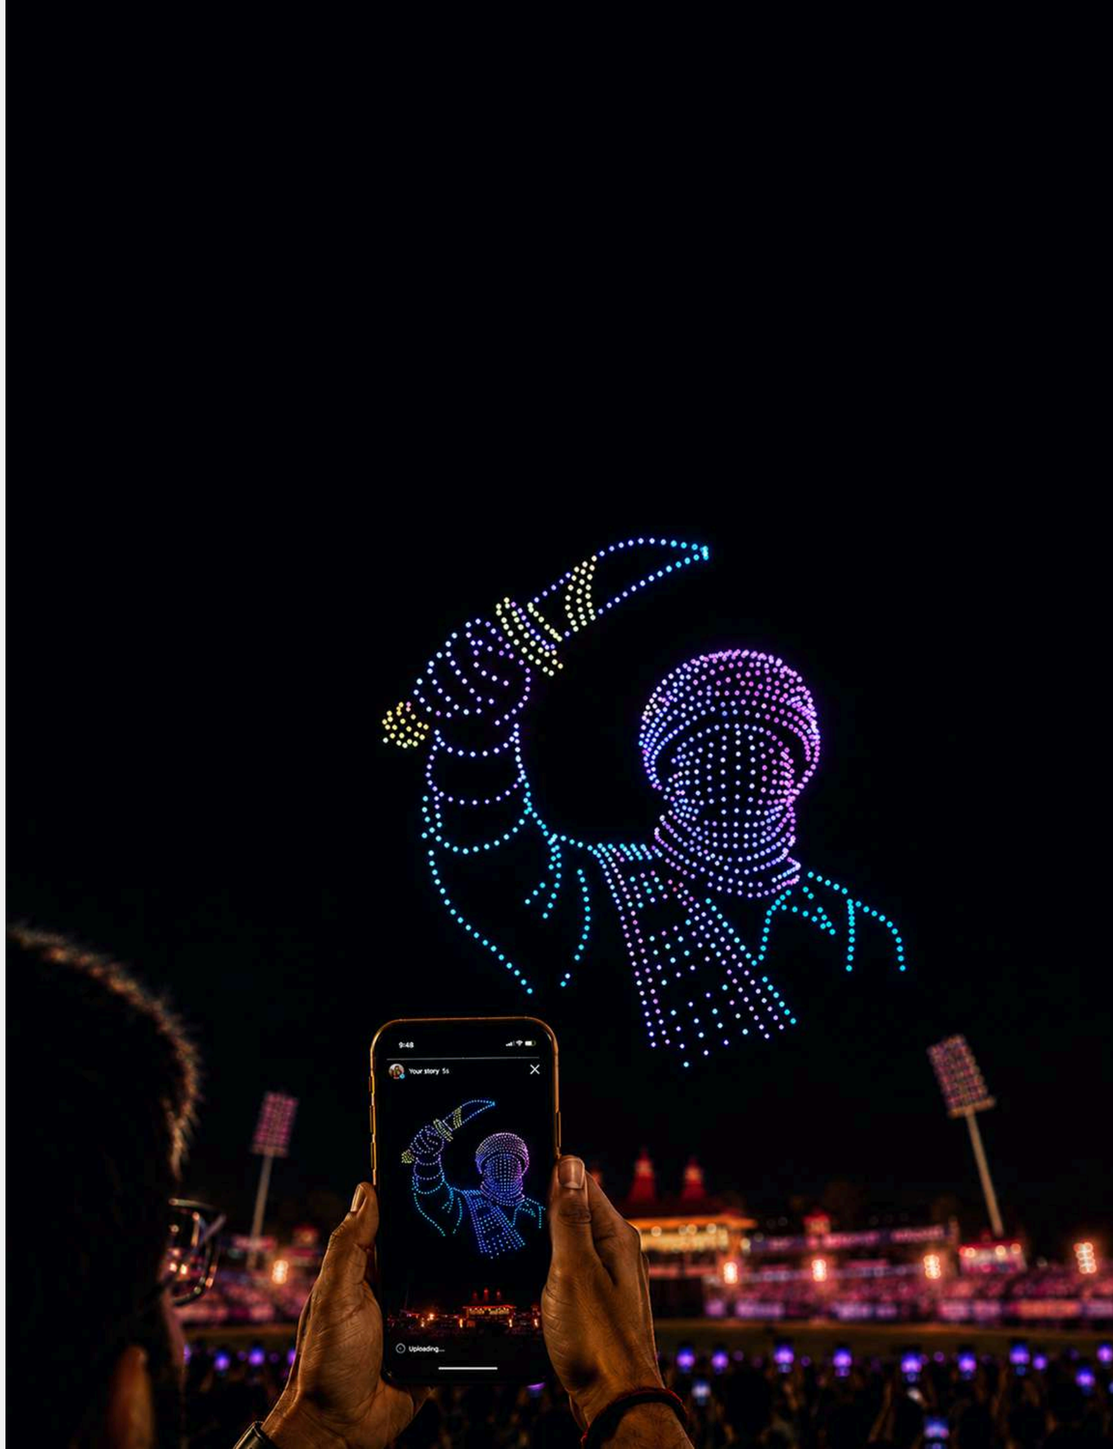

TRUSTWORTHY

We always deliver what we promise, every single time. Our track record speaks volumes, and our commitment to reliability ensures your peace of mind. Booking a drone show with BotLab Dynamics means you're in safe, capable hands. We handle the everything, so you can sit back and enjoy the magic.

Our communication is straightforward and reliable. We emphasize our commitment to delivering results and maintaining quality, safety and integrity, building confidence in our clients.

Speak in first person ("we"/"our"), rather than third person ("BotLab did…") on our website.

Be honest about failures, especially the pivotal Pokhran episode.

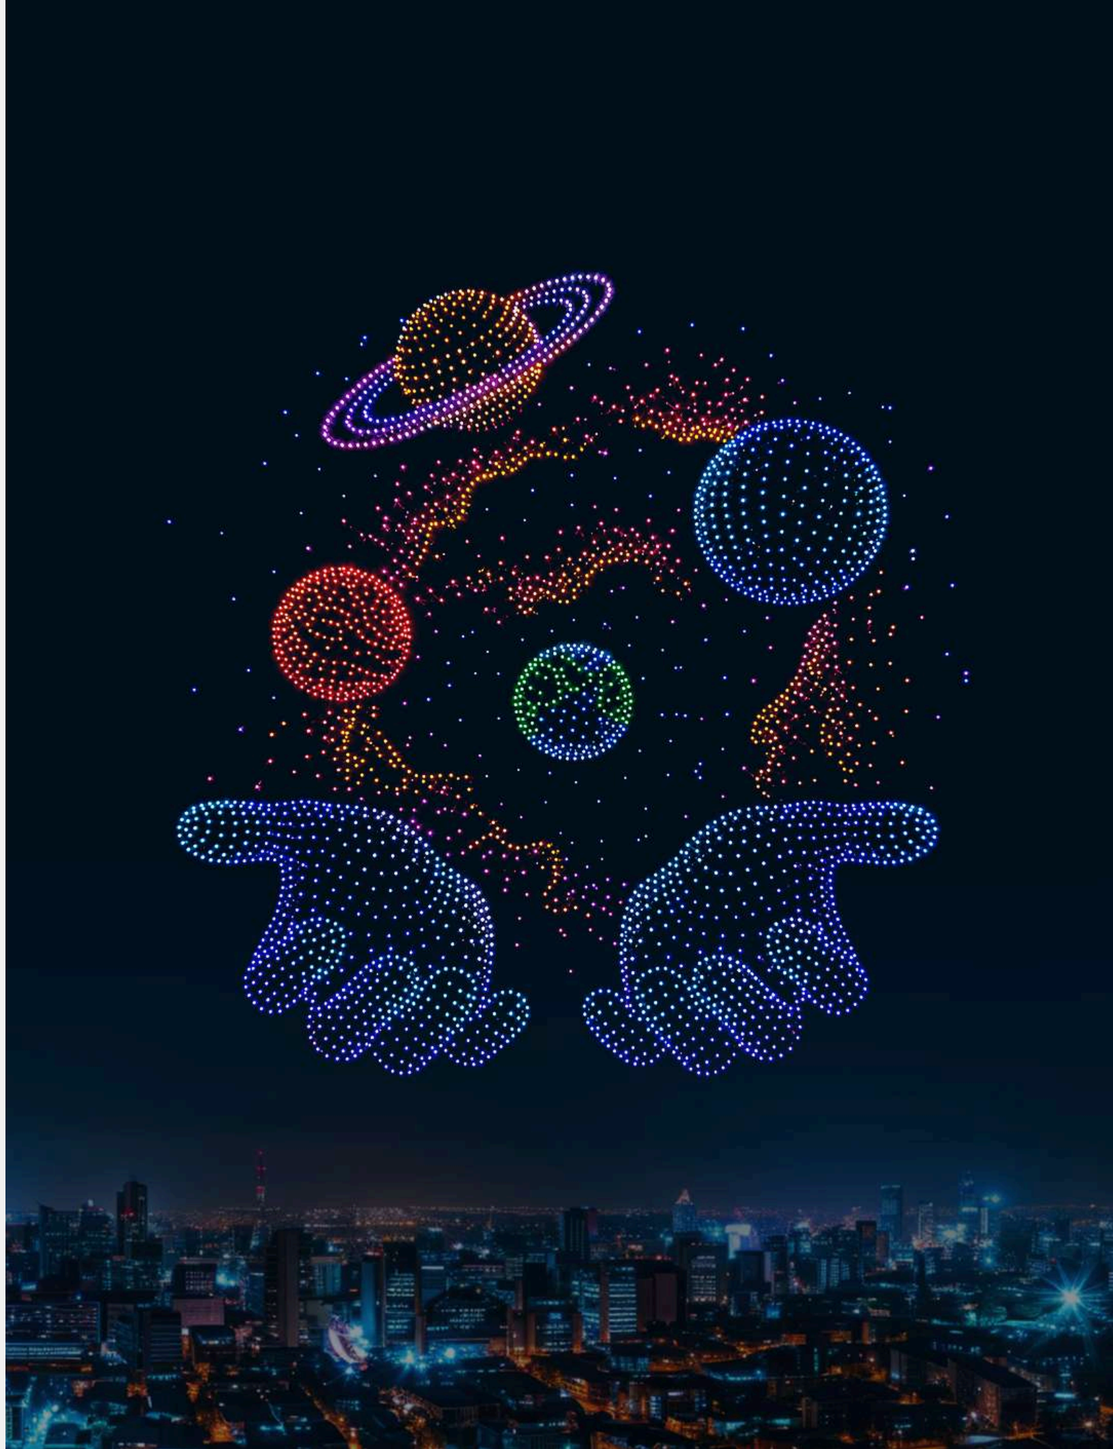

MAGICIANS

WE LITERALLY CREATE MAGIC IN THE SKY!

Our shows are designed to captivate and mesmerize, turning ordinary moments into unforgettable experiences.
We're here to induce awe and leave the audience spellbound.

Our words are lively, vibrant, and filled with personality. We inject excitement and awe in our captions. We aim to make our copy as captivating as our shows! We derive our language from aviation, light and sky-related terms.

Eg: We talk about our story with “Our Flight Path”.

POSITIONING

Keywords in our Comms:

We are Storytellers

Immersive Entertainment

Experiential Marketing

TARGET AUDIENCE

Primary TA

The Decision Maker

Secondary TA

The Drone Enthusiast

MESSAGING VARIATION

In a general sense, our messaging can be divided into three tiers that will influence the way we write and which audience we aim to reflect and connect with:

That BotLab Feeling

We speak the universal feeling of drone light shows with a metaphorical layer that make copies more poetic.

Example:
“Sky is your Canvas”
“Write your story in the Sky”

Packaging Wonder

We add **clever and playful twists to highlight the functional benefits** and core features of our drone shows. Our copy emphasizes the excitement, uniqueness, and sheer awe our shows bring to every event, making each moment extraordinary for our clients.

Experiential Marketing

We use **event-specific lingo to craft witty, engaging copy that resonates universally** while giving a nod to insiders. Whether it’s a festival, concert, or private event, our words connect with everyone and make them feel part of the spectacle.

The Visual Identity

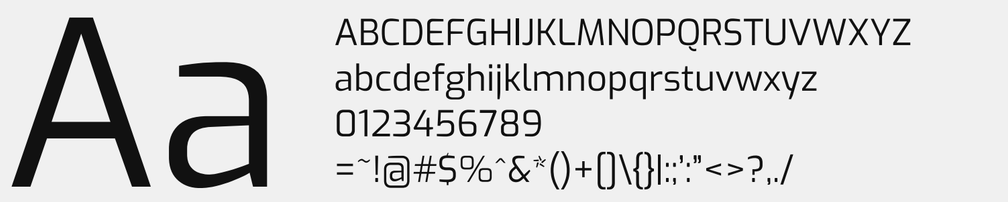

Premium. Dark. Brilliant.

04

TYPOGRAPHY SYSTEM

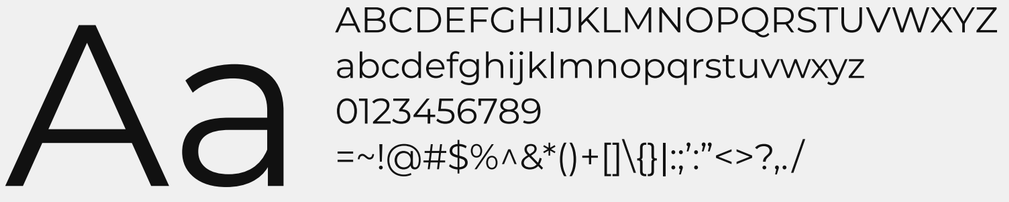

Primary Online & Digital: **Exo**

Used for all videos, social media reels, and high-impact web banners. It projects a geometric, futuristic, and tech-forward feel, and is available for download at **https://fonts.google.com/specimen/Exo**

Offline & Executive Decks: **Montserrat**

The corporate workhorse. Provides a grounded, highly professional, and polished feel for high-stakes client proposals, and is available for download at **https://fonts.google.com/specimen/Montserrat**

Bespoke luxury:??

Used for all videos, social media reels, and high-impact web banners. It projects a geometric, futuristic, and tech-forward feel, and is available for download at

THE CANVAS & THE SPARK

Botlab Gold

Used for primary accents, core highlights, and guiding the viewer's eye.

HEX: #DAB348
RGB: 218, 179, 72
CMYK: 0%, 18%, 67%, 15%
HSL: 46°, 66%, 57%

30% Charcoal/Grey

Used for subtle grid lines, secondary borders, and technical supporting details.

HEX: #231F1E
RGB: 35, 31, 30
CMYK: 0%, 11%, 14%, 86%
HSL: 20°, 8%, 13%

Pure White

Used for primary typography and crisp contrast against the night sky.

HEX: #FFFFFF
RGB: 255, 255, 255
CMYK: 0%, 0%, 0%, 0%
HSL: 0°, 0%, 100%

Infinite Black

The native environment. All layouts must anchor to this deep dark theme.

HEX: #000000
RGB: 0, 0, 0
CMYK: 0%, 0%, 0%, 100%
HSL: 0°, 0%, 0%

Strategy: **60% Black, 30% Charcoal/Grey, 10% Gold Accents** for maximum premium impact.

TREATMENT OF DRONE SHOW VISUALS

Brand Principle: The Sky is Our Biggest Canvas. Never Confine It.

✔️ Do

Position the drone show as the focal point of every visual.

Let formations breathe with ample negative space.

Showcase the vastness of the sky.

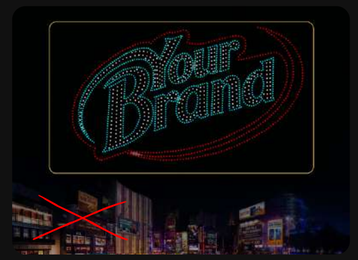

Use compositions that emphasize scale and grandeur.

Frame visuals to highlight audience perspective and immersion.

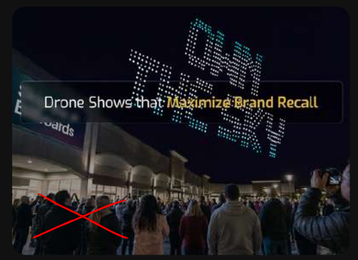

✖️ Don't

Place drone formations inside boxes, circles, or graphic frames.

Crop formations too tightly.

Let graphic elements compete with the drone show.

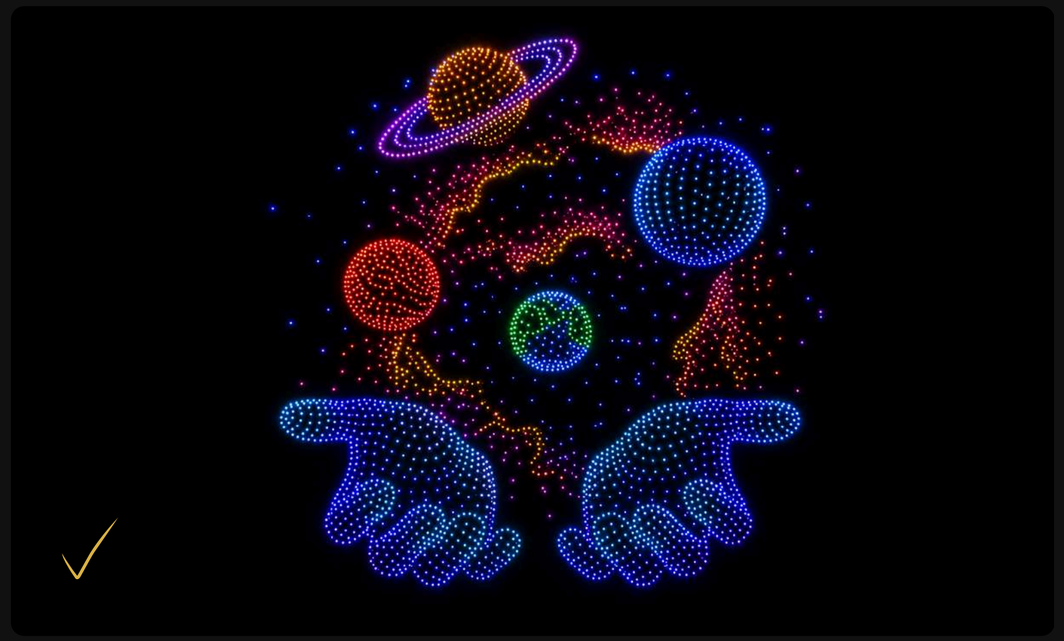

Add unnecessary overlays that distract from the drones.

TREATMENT OF DRONE SHOW VISUALS

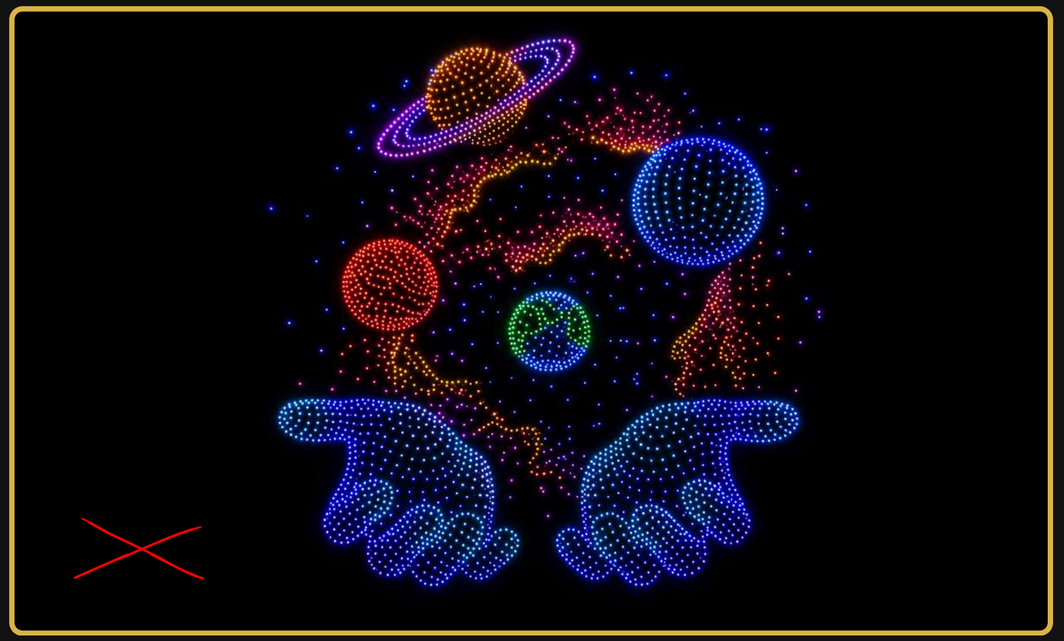

Drones are our Hero

✔️ Do

Put render with no border

✖️ Don't

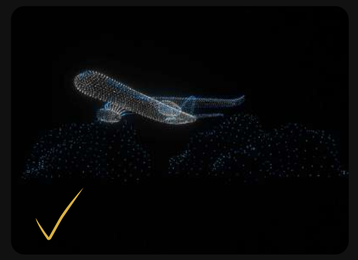

Never use border with render formation

HOW DRONE SHOW FORMATIONS SHOULD LOOK-LIKE ACROSS ALL CREATIVES

✔️ Do

Use visuals where individual dots are clearly visible.

Showcase crisp, high-resolution formations.

Maintain accurate spacing between drones.

Use actual show footage whenever possible.

If using renders or AI ensure drones appear as distinct light points.

If using sketches and not renders, ensure appropriate glow is added so formations appear luminous.

✖️ Don't

Use blurred formations.

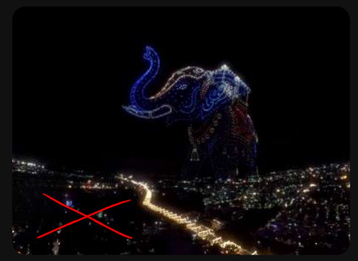

Use glowing blobs instead of individual drones.

Merge drones into one continuous shape.

Stretch or distort formations.

Use low-resolution screenshots.

USE OF AI

AI Should Support The Brand, Not Compromise Authenticity.

✔️ Do

Use AI only when high realism is achieved.

Maintain natural sky colours.

Keep cityscapes and environments believable.

Match drone spacing to real-world performances.

Ensure lighting follows realistic physics.

✖️ Don't

Use overly pink, purple, or fantasy skies.

Create exaggerated horizons or curved Earth effects.

Generate fake reflections or impossible lighting.

Use AI images that look illustrated or painterly.

Show impossible drone densities or formations.

IMAGE QUALITY STANDARDS

Every BotLab Visual should Look Premium.

✔️ Do

Use high-resolution imagery

Sharp drone formations

Professional colour grading

Clean silhouettes

Balanced exposure

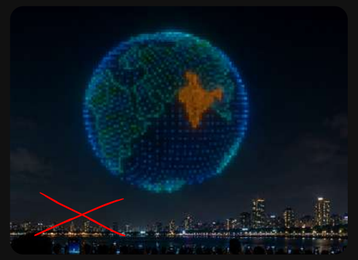

✖️ Don't

Pixelated images

Motion blur

Compression artifacts

Noisy night shots

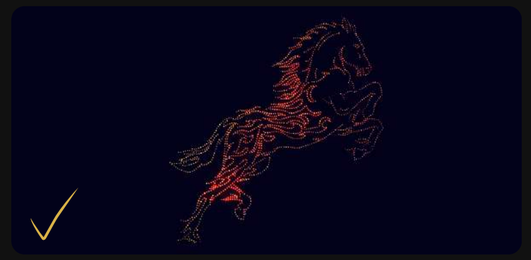

Washed-out colours

IMAGE QUALITY STANDARDS

✔️ Do

Deep Black

Midnight Blue/ Grey

Warm Golden Lights

White Drone Lights

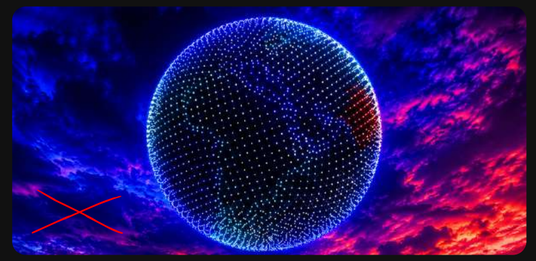

✖️ Don't

Neon Pink Skies

Artificial Purple Gradients

Oversaturated Backgrounds

Excessive Glow Effects
